Re: SEY / DVOR Radar Facility Building

I would like to thank and commend you and your crew for the recent asbestos abatement and lead based paint associated structure demolition of the SEY / DVOR Radar Facility Building just completed at the Block Island State Airport, New Shoreham, RI.

Your competitive pricing was greatly appreciated with your planning, compliance and performance beyond approach.

Meeting all State, Federal and FAA specifications and requirements you and your SITECON Team expedited all aspects of the Project from the Submittals, State approved work plans, Notifications, working extended hours to expeditiously complete thru closeout documentation, picking up valuable time on our already aggressive schedule.

The FAA have also announced their appreciation for your project documentation, compliance, scheduling and professional manner in which the work was carried out, earning approval as a preferred contractor.

I look forward to working with you and your Team on future projects and would most certainly provide reference for any other contractor's abatement or demolition needs.

Thank you again for a job very well done.

Please do not hesitate to call if you need anything else

Stephane Paul-Hus
