**Re: Thermal Concepts, Inc. – Letter of Recommendation**

To Whom It May Concern:

As a Senior Project Manager for Suffolk Construction, specifically for the Suncoast High School Replacement Project, I have personal knowledge of Thermal Concepts key personnel and work performance associated to the above mentioned project.

Thermal Concepts furnished and installed a complete HVAC package that included an extensive chiller plant/cooling tower building. I personally have always found Thermal Concepts staff to be efficient, productive and ethical. At no time did I ever find a need to do anything but praise their performance. Thermal Concepts upper management was always available to respond to any concerns that may have needed attention during the construction of a project of this magnitude. Their record on this project is one that does not reflect a contractor that is "claims oriented" and they always maintained a partnering spirit in resolving project issues that had cost impacts.

I do not hesitate in recommending Thermal Concepts, Inc. to any company that is considering them for a project. If you find you have any further questions regarding this matter, please feel free to contact me.

Sincerely,  
*SUFFOLK CONSTRUCTION COMPANY, INC.*
