

Testimonials

- **Dave Mitchell - CPI Communications & Power Industries**

CPI's teaming up with Apollo Safety was a great decision. I now have confidence that our alarm systems are working properly and are being maintained in accordance with industry standards.

- **Hector Chacon**

The biggest success story was from your services in the implementation of the gas detection monitoring system at our New Bedford waste services site. The vast knowledge of Apollo Safety in the gas detection arena was of great help in choosing the right gas detection system to monitor for hazardous gases released into the air where employees could be affected. I would like to commend you and your staff for a great job in implementing of the system installed.

- **Robert E. DePietro, Battalion Chief- Manchester Fire Department**

"Apollo Safety has been managing our gas detection maintenance program for several years. Their professional expertise has ensured our monitors are kept in good working order and most importantly, our department can rely on their equipment when they need it most. Their service has always been prompt, efficient and it continues to be a great value to us."
