To Whom It May Concern:

As a project manager for Virginia Paving Company, I have worked on multiple projects with D&M Concrete Construction over the last 15 years. The projects have ranged from a 5 year maintenance contract with the United States Navy, to road improvement projects for local municipalities, to smaller private jobs. These projects have ranged from \$50,000 to \$25 million. The amount of work that I have completed with D&M Concrete qualifies me to confidently write this letter of recommendation.

As I have seen firsthand, quality has always been a priority of D&M Concrete. On the many jobs we have worked on together, they have always provided quality work in a timely manner. They approach each job with professionalism and urgency all while showing willingness to be fluid and adapting to the ever changing requirements of projects.

Once again I would like to emphasize the quality of work D&M Concrete performs. I would strongly recommend them with no reservation for any concrete work, no matter the size or scope.

Sincerely,

Virginia Paving Company
