Dear Sir or Madam:

This is an open letter of recommendation for Frost Construction Company of Humble, Texas.

I know Frost Construction from our work together on the City of Deer Park Fire Station No. 3. We enjoyed an unusually high level of communication and candor with their representatives, and this resulted in a project of very high quality. Their management of the trades was characterized by experience and attention to detail. Technical problems were usually identified very early and were solved in a spirit of cooperation and mutual commitment to the best possible building. In short, their standards are very high. The jobsite was very clean and neat, and I am aware of no injuries during the project.

Frost's approach to the Owner and to us was always diplomatic, with an emphasis on foresight and clarity. Coordination with the Owner's operations and with those of separate contractors was as smooth as possible. They were prompt to respond to the Owner's requests for change, and generally responded with reasonable prices, requiring less time in negotiation.

On a personal note, it has been a privilege for me to work with the people whom Frost assigned to the job. I wish them well and would recommend their work to anyone who wants the best quality of construction possible.

Sincerely,

Glenn Knowles, RA
