

July 21, 2009

To Whom It May Concern:

I take this opportunity to endorse Mr. David Strong, President of Strong General Contractors, Inc.

I have worked with David on three (3) separate projects since 2006. The first was the interior construction of a 17,500 SF building to act as the main campus of Southern Technical College in Orlando, Florida. During that project, I found Mr. Strong to be highly reliable and responsible. He was easy to work with, responsive to requests for information and advice; and produced the quality outcome that he had promised. After the project completion, Mr. Strong continued to be responsive to phone calls concerning the building's construction and quickly and professionally handled any warranty issues.

Subsequent to that project, in 2008, Mr. Strong was contracted to do the interior construction of Southern Tech's 20,000 SF campus in Sanford, Florida. Strong General Contractors is currently completing work on the new 12,500 SF campus in Mt. Dora, Florida. As with the first two projects, he is completing the current campus on time and on budget. For these reasons, as the College expands in the future, Mr. Strong and Strong General Contractors, Inc. will be on the College's short-list of professionals asked to bid on any new project.

I confidently recommend Mr. David Strong for any construction project within the scope of his business. If you would like to discuss these projects with me you can call me at 407-323-4141 or you can email me at jeuliano@southerntech.edu.

Sincerely,

John D. Euliano
President
Southern Technical College
