**Project Performance Report – Regency Construction
Icebox Cafe Terminal A DFW Airport –**

Regency Development and Construction Services built our first Icebox Cafe at DFW Airport. Not only did they complete all work in a timely manner, the professional quality of their work was superior, exceeding industry standards.

I found their entire team to be responsive and accessible to our team and design professionals. They went beyond their “scope of work” to make sure that every item was completed and that we, the client, were satisfied and pleased with the end product. We have other projects planned for DFW Airport this year and am looking forward to the opportunity to do business with them again.
