To Whom It May Concern:

Please accept this letter as my highest recommendation of the full service site work contractor, Amaxx, Inc. I've had the opportunity to work with Amaxx on a variety of new construction and renovation projects valuing their work over \$1.1M.

Amaxx has continually provided fair pricing during the competitive bid spec process. Upon award of the work, Amaxx has provided the specified materials and the labor to start and complete each project on time. Amaxx's labor force is highly qualified to operate any and all site work machinery and has the expertise to plan, purchase and install with attention to detail various site work components including two-tier 235' long retaining walls, storm water sub-surface systems, sanitary systems, well systems, commercial electrical, communication and gas services, asphalt paving, concrete curbs and sidewalks as well as landscaping. They work at maintaining good relationships with the rest of the construction team. Jason and Pat stay involved and are accessible throughout the project.

Our project in Mahopac started in June 2018, and was completed by November 2018. This project was located in the Amawalk Reservoir Basin. All of their work was inspected regularly by NYC DEP and the Chazen Companies for stormwater pollution prevention. Amaxx started and completed all of their contract scopes of work without any violations. Amaxx not only produced a quality product, they maintained the schedule completing it on time.

Amaxx, Inc. is a company that Turner looks forward to working with in the future. If you need further information, please call me at (914) 489-4045.

Respectfully,

Turner Construction
