Product Spotlight

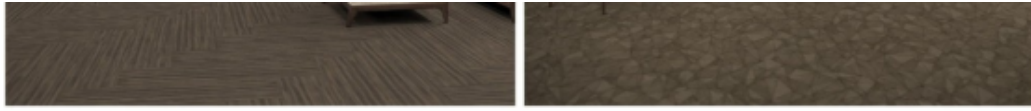

Unique, Kinetex: What value will it bring to your facility?

Picture the durability of resilient flooring meeting the acoustical and textile comforts of carpeting. Kinetex is a durable textile composite flooring that combines the best of both worlds.

- Dries in a snap and retains less water than carpeting.
- Stain-resistant properties repel most stain agents and it is easily sanitized.
- Minimizes air particles that trigger allergies and cause infection.
- One of the only wall-to-wall textiles certified as "high traction."
- One of the most slip-resistant flooring surfaces ever tested.
- Reduces air-borne and structure-borne noise - improving voice recognition and occupant perception.

Learn How Time Travel Therapy Benefits Seniors

An estimated 5.7 million Americans are living with Alzheimer's dementia in 2018. (Gulp.) People are mentally ripped away from their family and friends and become trapped by their own minds. I am not a doctor or a trained professional working with Alzheimer's dementia patients, but the staff at **TeamPAR** are professional interior designers that believe in the power of the **built environment!**

Those with Alzheimer's dementia can become anxious and isolated (especially when sedentary) and barriers in communication can become the norm. The power of reminiscing has a positive impact and elongates engagement with loved ones. **By building an environment that returns Alzheimer's sufferers to a place in their lives where there was no perceived failure and a time when their memory was intact, they no longer feel lost. Brilliant!**
