Description Of Work

I called them twice. The first time for my kitchen sink. The pipe below the sink was broken. The second time I called them for a bathroom shower. The drain was not draining anymore.

Comments

I called them Friday evening and they showed up early Saturday morning. They repaired the pipe and they did a great job. The guy came out and said he can't repair because of the style of the bathtub. He recommended that I use a gallon of Clorox. I am happy that he didn't insist on using any expensive repair when it was not needed. He didn't charge me for that.

Customer: Jochen A.

Description Of Work

Located break in sewage line which resulted in misaligned sections of sewage pipe. Replaced section of pipe and joined it to adjacent sections. Price included locating the problem with a camera and replacing the pipe.

Comments

They had to move some foundation plantings to get to the pipe. Also, since the digging was in the foundation planting area, they had to carefully control the movement of the dirt out and back. After completing the job they replaced the plantings and left the area clean.

Customer: Robert W.

Description Of Work

They replaced a faucet and repaired a leak in my kitchen pipes and sink.

Comments

We have never had any problems with this company and I am pleased with the work. They are hardworking and professional. They made sure to take care of everything thoroughly and efficiently and for a great price as well. I would recommend them.

Customer: David W.

Description Of Work

We had some remodeling done at this residence. TWP added some rooms into the home. They also did some new plumbing and revised some already existing plumbing work for us. They also came to put in a shower fixture for us. They hooked up a sink too. They were working in an area that was about two thousand square feet.

Comments

TWP's work was very good. They were actually the company that was subcontracted out by our contractor. Now, if our builder had done half as well as TWP, we would have been thrilled with him too! This company did very neat plumbing work. We had no problems with them at all.

Customer: Marcello H.

Description Of Work

He came to check why the ceiling under the shower showed signs of moisture. In testing, he found the grout needs to be repaired.

Comments

They are pleasant and efficient. The price is reasonable.
