

February 13, 2014

John Rellos / Rellos Construction provided construction services from 1982 to the time of my retirement in 2007. He worked personally with our in house Architects & Construction Team as a General Contractor and treated our developments as if they were his own. Every job large and small was completed on time, as well as on budget. There was not a single occupancy date missed or overtime cost incurred including nights, weekends, or holidays. He and his company did what they agreed to in order to make every project a success. Their track record speaks for itself in completing approximately 1,500 to 2000 jobs for us. In all the years I worked with John he remained a man of integrity and dependability.

**Torrance Commerce Center: Light Industrial Office Park**

*Interior Shell Construction & All in Tenant Improvements & Tenant Relations & Negotiation*
