

# Our Testimonials |

*"I would like to say that both the Owner [Boeing] and the Contractor [KBR] complimented your firm for excellent service on this contract, please let your team know that they did a great job and their work was noticed and appreciated."*

*RS&H also noticed and appreciates the service you provided. Clients tend to view a team as one entity and to be successful all members need to perform, your firm did a great job."*

**- John Holt, AIA, NCARB, LEED AP, Senior Architect, RS&H Aerospace and Defense division**

*"It seems like businesses today forget that people are what business is all about. That's not true of Arias & Associates. I'm writing to let you know that your company is a great example of what a business can be. Team players, extremely qualified personnel and your willingness to provide services and information day and night at last minute notice, in the office or from your homes kept this project going when we needed it most."*

**- Aaron Norman, Quality Control Manager, Satterfield and Pontikes Construction, Inc.**

*"We know we can always count on Arias to be responsive and to deliver high quality work. In my mind, they're top notch."*

**- Brad Davis, P.E., Vice President, Jacobs**

*"Arias & Associates conducts themselves in a professional manner, placing high value on being prepared, thorough and prompt. We value our continuing relationship with Arias and highly recommend them."*

**- Brian C. Cox, Senior Project Manager, Koontz McCombs Construction**

*"I have thoroughly enjoyed working with Arias for the past several years. They are very responsive, easy to work with and provide quality reports and detailed geotechnical information."*

*We continue to partner with Arias for our geotechnical needs because of the level of service they have provided for us and the trust we have developed in their capabilities to handle any size project and project schedule."*

**- Jaime Aguilar, P.E., Head of the Transportation Projects Department, Chiang, Patel & Yerby (CP&Y)**

*"Arias & Associates has provided exceptional customer service and has been very responsive to the very short schedule demands of our design and construction projects. Their staff is friendly, professional, and delivers the assigned tasks within the assigned time frame."*

**- Frank M. Jaster, P.E., Senior Project Manager, Transportation Division, Civil Engineering Consultants**

*"I wanted to thank Arias & Associates for the service you provide in helping make the City of San Antonio Public Safety Answering Point project a success. Arias & Associates provided accurate and timely service to the Public Safety Answering Point project. I was impressed how their field personnel were always accommodating to the demands of the construction schedule, especially during foundation inspection and testing. In addition to field observations, their reports were very well organized and timely. I cannot emphasize enough how important this service was in helping keep the project delivered on schedule and at the highest level of quality."*

**Ben Martin, Senior Project Manager, Sundt Construction, Inc.**

*Arias and Associates has always been a pleasure to work with. Arias is always accommodating, even when we've had to call the same day. Arias also goes above and beyond their regular duties, providing slump charts and accurate, detailed, and comprehensive test reports. We've used their concrete testing, density testing, and welding inspectors, and all have been very professional, honest, and cooperative. But they are also very well-prepared, well-trained and qualified, making very pertinent recommendations and decisions whenever there is a deficiency that is discovered. I would definitely recommend using Arias and Associates to any General Contractor or Subcontractor.*

*...Arias and Associates has been a major force in fulfilling my and GUYCO's duties in providing a Quality Construction Product to our Customers."*

**- Alfred Herrera, Quality Control Manager, GUYCO, Inc.**

*"Throughout the years of my working relationship with Arias and Associates, their team has always provided excellent and prompt service. The geotechnical engineering of a foundation system establishes the fundamental strength of a building and the construction material testing confirms that the quality of the building is achieved. Arias and Associates is consistent in providing both services, but more importantly has been proactive when construction problems and delays have required their additional attention and expertise to ensure that my clients are provided with the quality building they expect."*

**- Alan Neff, RA, LEED AP, Project Architect, Robey Architecture, Inc.**
