To whom it may concern,

I am happy to recommend Metis Construction as a design build contractor. Metis has worked on multiple school projects for our organization. The team is very professional and has a commitment to quality.

Each time we have worked with them the process has been simple and efficient. The design team is focused on our needs and truly listens to what we are looking to include in our floor plans. They have gone above and beyond to support us with zoning and permitting to get our project started on time.

The construction team is always very conscience of our needs and communicates throughout when changes occur.

Please feel free to contact me with questions.

Warm Regards,

Paulette Hare | Executive Director of Operations
