The Bainbridge Township Fire Department has used Metis Construction for two projects in the last couple of years and have been very pleased with their personnel and quality of work. The amount of care that they took with regard to quality of work, timeliness of the projects and leaving the site better than they found it was refreshing. Ben followed up to make sure everything was right, and that we were satisfied with the job. Their billing and office staff were great too. I would highly recommend Metis Construction.
