

# Advocate Aurora Healthcare

Advocate Aurora Healthcare needed to relocate the necessary staff in the Burlington/Walworth Wisconsin area to a new facility with minimal impact to their productivity and workflows.

Many of the services at Burlington and Lakeland Hospital were outgrowing their current space. By building a surgery center, cancer center and collaborative care clinic in the community that is easily accessed off the freeway,

Advocate Aurora Health Care was able to bring the latest in technology and personalized care to the patients at the new Advocate Aurora Health Care, Southern Lakes.

The goal was to create a new look for the clinic that incorporated key brand elements that are recognizable in other Advocate Aurora clinics and hospitals such as the teal accents, red brick and tan stone, but in a modern way.

The design is very successful and has been well received by patients and visitors. With a clean and modern feel and comfortable furnishings from Interior Investments, patients know that they are receiving the best care at Advocate Aurora Health Care.

*"Interior Investments was great to work with on this project with furniture layouts, 3D renderings, scheduling, and installation. Everything went smoothly and their design team was very professional. We look forward to working with Interior Investments in the future as we improve our patient care and remodel and expand Aurora Health Care."*
