To whom it may concern,

I am writing to recommend Bob Ames Excavating, Inc. for any utility installation or general construction projects. I recently work with Bob Ames Excavating on a sewer line and site preparation project for the Town of Estes Park. The project consisted of the installation of 1500 linear feet of sanitary sewer and site preparation for the Town of Estes Parks proposed five million dollar multi-use building at the fairgrounds.

The project was very challenging due to continuous plan changes and delays by the design engineer as well as dealing with unexpected ground water through a portion of the project. Chris Ames and crew were very professional working through all the unexpected plan changes and were very fair on negotiations of change orders due to improper design.

Ames Excavating does very good work and was very easy to work with in the field. Their administrative staff was very organized and quick to respond to any of my request.

I have over 24 years of construction management experience; working with Ames Excavating on the project in Estes Park was very easy as they demonstrated utility and general construction expertise. I highly recommend Ames Excavation for any utility or general construction projects.

If you have any questions or would like to discuss this recommendation, please feel free to contact me at (303) 901-4553.

Sincerely,

Michael Hager
Senior Construction Manager
