Hey Bob,

See below from Westfield. Can't thank you, Ron and all the guys for all your help in getting things corrected and ready for the install team. This is the first "atta boy" that has been given out for this project nationwide. So this is a big deal and means a lot.

Thanks!

All,

Old Orchard is complete. All units are up and running and look really nice. There are a few minor punch items that Esprit will take care of But nothing that anyone would ever notice.

Eric, Shane's team was amazing on this site, they where great on all the others but this one was really good.

The weather was less than desirable but everyone worked thru the freezing cold and rain in the early morning to get it done.

Thanks everyone,

David Taylor | Sr. Director, Digital Operations
