Dear Timothy,

I want to take this opportunity to commend you and your team at Paramount as well as your subcontractors for an excellent job well done for the Academic East construction project. In my tenure at Zartman Construction, Inc. I can attest to the dedication that Paramount puts into quality of workmanship and problem.

I would also like to acknowledge the difficulty and challenges associated with this project. The construction schedule allowed only fifteen months for the total construction of this 78,000 square foot facility, which includes thirty engineering labs, thirty-three offices, several classrooms, and many other collaborative spaces. Regardless of the schedule this building would have been difficult to construct based on the challenging details and complex geometries.

The dedication, long hours, and perseverance of your team should be commended, and I am extremely grateful for their efforts. While there are numerous individuals at Paramount and its subcontractors who were instrumental in the success of this project, I would like to especially thank your site supervisor Mike Wolfe. His expertise and dedication to delivering a quality project in a timely fashion resulted in this project being a success.

We look forward to working with Paramount Contracting in future projects.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Daniel Zartman', with a large, stylized flourish at the end.

Daniel Zartman, P.E.  
Project Manager
