Design & Manufacture of Architectural & Specialty Coatings

How do we keep your paint & coating jobs looking brand new... longer?

“Bioquell” is the secret.

It's a trademarked blend of 4 powerful biocides that make our paints and coatings stay bright and clean far longer than other paints on the market today.

The chemical composition is a closely guarded secret and we can't tell. We can tell you that products containing *Bioquell* are really unique.

Maybe you don't hear as much about Acry-Tech as national brands, but you've probably noticed some of the freshest roofs and walls there in your neighborhood. We keep those roofs and walls looking new...longer!

Thousands of dollars and years of research has created *Bioquell*. We're proud of it and we know you'll be delighted with the performance of our coatings with *Bioquell*.
