

Testimonials:

“I have been doing business with Bingham Engineering for about the past 4 years and have only experienced fast and friendly service. I have worked with a few of their engineers there (Rocky, Matt, Jeremy, and Dan) and they have always promptly returned my calls and been available for site inspections. I always feel like I am their #1 client and have frequently stopped by unannounced to have them meet with me at a moment’s notice for changes to the plans occurring in the field and for city comments.”

“Great to work with – Matt has helped me with my remodel. He provided drawings promptly, always took my calls, and answered my questions on several occasions. I would recommend him without hesitation.”

-E Clarke, citysearch.com

"Thank you Bingham Engineering! It took a couple searches to find a great engineer to help us with our structural issues with the house we bought. Bingham Engineering scheduled a inspection the same day we called. The service was fast and done on time. I appreciate the good work and good price and will refer Bingham Engineering to anyone I know who has been in the same boat."
