Re: *Northeast St. Petersburg Office Renovation*

Dear Sean,

Now that we have been in the newly renovated northeast office location, I wanted to express my gratitude for a job well done. From the initial bidding through to project completion the professionalism, expertise, and communication of you and your staff was appreciated. It seemed as if I was giving project modifications to Mike almost weekly, yet he happily worked through all the change orders with his great sense of humor and efficiency. The ability of you and your crews to work with the adjacent office and landlord was also noted. Those potential challenges were dealt with masterfully, which has not only helped to maintain—but largely improve our relationships with those principals.

All this of course would have been for naught had we not had a good quality end-product. We are delighted with the office renovations, and have a genuine sense of pride in the outcome of it all. Please count on me for a positive reference should it be required, and I will definitely be in touch with you for any other construction needs I can dream up!

Sincerely,

James L. Horner, DMD
Oral & Maxillofacial Surgeon
