Dear Christine:

On behalf of Lammey & Giorgio I just wanted to reiterate what I've said countless times to you during the course of this project.....thank you!!

This was a challenging project on many fronts. The schedule was very short, there were many client agency requested changes during construction, and the concealed conditions at the existing building tested everyone's ability to make prompt and appropriate decisions. In spite of all of that, the project was a great success for the State.

The effort made by the entire Golden Crown team of contractors and subcontractors was a major factor that contributed to that success. You reacted quickly, provided us with the necessary information to make decisions, and you completed work at off hours to insure that the State's deadline was met. As you know, this was very important to the State as they were moving from a leased to an owned facility, and delays would have meant additional rent payments.

I hope that we have the opportunity to work together again in the near future. Best wishes for continued success!

Sincerely,

LAMMEY & GIORGIO, P.A.

William P. Lammey, AIA
