Re: Regional Building Department

Jim, I wanted to personally thank you for the exceptional approach in which this project was handled from the bid documents to its final completion. Your team and your sub-contractors were instrumental with both phases of this project which flowed smoothly with few interruptions. Even with several significant changes, everyone worked at making our decisions a reality.

This two phase, 1.2 million dollar project had its own unique difficulties to course through which included maintaining our work force through the relocation and utilizing much of our existing materials while not slowing our day to day work activities. Both were handled with finesse.

Jeff Bowman is a quality superintendant with many years of experience. Jeff made this project "fun". As a Project Manager myself for several years, I know the stresses that come with the job, and Jeff handled every challenge with professionalism and confidence. It was a pleasure to get to know Jeff on and off the job.

I appreciate the work ethic of this company and the safety record that accompanies it as well. I know that our employees felt out of harm's way while work and change was progressing all around them. I am grateful that you take your safety record very seriously, and it shows.

Jim, I would not hesitate in recommending Wells & West General Contractors, Inc. when the question is posed. The final product is one that shows well, is very functional and that I am proud of. You should be also.

Curtis A. Martinell
Deputy Building Official
Pikes Peak Regional Building Department
