

To Whom it Concerns:

Over the past few years, Wells & West General Contractors, Inc. has provided the Regional Development Center with several interior remodels throughout Regional Building and the El Paso County Facility.

All those interior remodels were personally handled through me as the person of contact for the Building Department. These remodels were professionally done with little to no interruptions to staff and clients and completed on time. If at any time there were conflicts between the drawings and work needing to be completed, a representative from Wells & West was willing to meet and discuss the needed changes to keep the project on schedule.

If, as a concerned client, you have any questions, do not hesitate to contact me at the information listed below.
