Re: Letter of Recommendation
Midwest Construction Services, LLC

To whom it may concern:

Midwest Construction Services has provided environmental remediation services for AMERECO Engineering since June of 2009. Midwest Construction Services has provided over \$ 800,000 in Environmental Construction projects for AMERECO. The work relationship involves several public sector clients such as school districts and government entities, as well as private sector clients.

The remediation services provided by Midwest Construction Services include Asbestos Abatement, Lead Abatement, Mold Remediation, Interior Demolition and Fluorescent Tube & Ballast Recycling. Midwest Construction Services has consistently responded to all requests to the satisfaction of the client and AMERECO. Projects have always been completed within the contracted timeline and in a professional manner.

Please feel free to contact me for any specific project information.

Respectfully,

John Blosky, CHMM
Principal
