

Testimonials:

We needed a new iron safety door plus installation. Called around several companies but they always tried to sell us extra's and a more expensive security door. We know of a friend who had used Isaac's Ironworks in the past so we decided to give them a call. When I called Isaac's Ironworks... they stopped by and gave me an estimate for exactly what we wanted, so we decided to go with them. To our surprise.... the new iron door and installation was done in a breeze. They finished a couple of hours than previously expected. They were professional, courteous, and complied with our every demand. Overall it was great service and we will definitely use Isaac's Ironworks Inc. again.

-September 09, 2011 Claudine- Wrought Iron Doors

Wrought iron railings on two Juliet balcony's from a specific design. I was getting work done on a vacant apartment. The Painter was scraping the Juliet balcony threshold when the wood just crumbled and there were hundreds of termites. I called a termite company in and they treated it, but I was concerned about the safety of the actual balcony. While the beams did not have termites, it did have water damage. I had to have the balcony totally rebuilt. The wood balusters were also damaged, so wrought iron was our choice. We live in a Historical neighborhood and I had received permission for a specific design (1920's) for my wrought iron work on another Juliet balcony on the side where I live but never got around to doing it. That was two years ago. But since I have to do it on my tenant's side, I thought this would be a good time to do ours also.

I looked on Angie's list and called a few wrought iron companies that had good feedback. Issac was the only one who came out. The others had me email the design to them so they could bid on it. But Issac was right there. Personality Plus. The best contractor I have ever worked with. He knew I was in a time crunch since I was trying to get the apartment ready to rent. He promised me I could look at a sample before the whole railing was completed. Even though he had to go out of town, he had his wife Sarah and his manager Johnny on top of things. I went to their shop and was very impressed. All the workers are great. Very helpful. They delivered it and installed it on the day it was promised, and it wasn't an easy job. These were very heavy pieces that had to be lifted from the outside because they would

not go up the curved stairs in the unit. I am very happy, and so glad I met Issac and his wife. I will be using them again.

-November 17, 2011 Joyce - Wrought Iron Railings

I had used this company 6 years ago and misplaced their info. I called one of my clients for a recommendation as the iron work at her home is phenomenal. She recommended Isaac and when he walked into my home he knew immediately what work he did before.

The railing put on from 6 years ago looks like new and the style is ageless.

I build a balcony and Issac did some amazing work along with a gate and the work was done for 20% less than any other quote I received.

The work was done professionally and on time. I sent his info to a few other clients and two out of five said they are already calling as they too heard about what a first class operation is run at Isaac's Ironworks.

It is great to find people like them so we feel not only taken care of but know we are getting our money's worth.

The overall result is that it was perfect. A few neighbors came to look and agree that the work is fabulous and makes a huge difference. Additionally Isaac is an artist and is happy to give you his input should you wish to get another opinion.

-September 14, 2011 Anita - Wrought Iron Railing

They made and install a gate for me. I was happy with the price they estimated. They are very efficient and on time. The quality of their work is excellent.

-July 15, 2010 Carolyn -Wrought Iron Gate

The owner, Isaac is friendly, honest, and punctual and provides high quality wrought iron fencing at a reasonable price. He guarantees what he delivers. I would definitely recommend him and call him again for service. Excellent. He replaced a broken sliding metal door for our apartment building parking garage.

-September 19, 2012 Debra - Wrought Iron Fencing

They gave me an estimate for a driveway gate. The interaction with them on the estimate was pretty good. It was easy to have them come out.

My wife and I have been renovating our home over the past 2 years. I found Isaac's Ironworks with a Google Search. We sat down with Isaac and his staff to create a unique set of Iron exterior screen doors for six of our portal to our backyard. We also modified iron chairs, tables and had them design and fabricate two front entry gates. Their care for detail is extraordinary, the fabrication work is precise and the installations are seamless. We are so pleased to have first found these "Iron Artists". With Isaac Ironworks, the process is a pleasure and the results permanent.

-January 2013 Gilbert - Iron Exterior Doors

I needed wrought iron railings installed on both sides of a set of front steps, for the safety of my tenants, who are getting on in years. Isaac designed the railings, constructed them, and installed them. Isaac was a most pleasant man to deal with, and did a most professional job in a timely manner, and at exactly the price quoted. The railings are very sturdy, and very attractive.

-July 5th 2011 James - Wrought Iron Railings

Designed and installed hand rail, security doors and window guards. Isaac's Ironworks was the best overall experience we have EVER had with any contractor. Isaac is very easy to work with, not only extremely friendly but the level of professionalism is top notch. There are not enough STARS to rate him highly enough! His pricing was the BEST that we got throughout all of the San Fernando Valley. We first heard of Isaac on the Ellen D. show on a YouTube Video. When I heard about Isaac doing work for the great Ellen D, I said we CAN'T afford this guy but wow was I WRONG!!! We had five contractors' quotes and none of them held a candle to Isaac's pricing and quality of

workmanship. Here's what took place. Isaac color matched everything to the trim on our home. It looks beautiful and is the talk of our neighborhood. The design of the mad security doors and guards were very detailed and was constructed with top quality materials- solid and not hollow iron like some of the contractors were quoting. Isaac listened to all of our concerns and made the window guards, security doors, sliding glass security door and hand railing so fancy that we feel safe but not closed in. Our bathroom has a glass bay window that he designed a case it to secure it this was a pure work of ART. He took special care to make it really classy and still something very pretty. It was designed like a white vine with leaves going around the window and it came out beautiful. Isaac promised to have all of the windows and doors designed, welded prime & painted and installed in two weeks which he did. His team came out to our home and they were on time, very polite and most of all very professional. If there was something we wanted added or fixed, they did it with smile and cleaned up after themselves when they were done. Isaac is a really great guy, fun to be around and made us both feel very comfortable. I would recommend him to anyone. This is a contractor that truly knows the meaning of: workmanship. He uses quality materials, knows how to make the customer feel comfortable and his customer service is excellent. Isaac has two new and very happy customers.

-Lorie - Designed & Installed Hand rail, security Doors and Window Guards, September 2012

From the moment i met Issac he had a smile on his face. From start to finish I was more than pleased. His meticulous attention to detail truly takes iron work to a whole new level. Issac is sensitive to time constraints and delivers on time. It is not often you find contractors like him. I wish I met Issac earlier. Without any hesitation. I truly recommend Issac He is the best iron man in the city!

-Mark - New iron staircase and new iron work outside my home, May 11th, 2012

Isaac came to my house and measured the area and we looked at types and styles of railings on his website. I selected three styles on which he was to quote. After receiving the quotes, I selected the style and he and his associate came to the house to measure for the job. It took about 3 weeks to fabricate my specific railings and then the workmen installed them. There were three workmen who arrived on time in the morning and were finished around 3:00

in the afternoon. The men removed all of my plants and patio furniture from the patio prior to erecting the railings. They were very careful with everything. After they were through, they put everything back in the exact same spot after washing off the patio and leaving everything spotless. The railing has enhanced our patio and we are very pleased with the effect.

-Virginia - Installed wrought iron railing around patio August 6th 2012

Fabricated and installed electric gate, two side gates, gate on side door and an amazing door gate on my french doors that is stunning and opens in three ways. My experience with Isaac was amazing from start to finish. His work is professional and timely. He is very forward thinking and came up with amazing ideas and designs. My husband and I are thrilled with the finished product. I have had people ring my bell and ask who did my gates. My gates look like trees with leaves. They truly are stunning.

-May 30th 2011 Wendy - Fabricated & Installed Electric Door Gates

My wife and I have been renovating our home over the past 2 years. I found Isaac's Ironworks with a Google Search. We sat down with Isaac and his staff to create a unique set of Iron exterior screen doors for six of our portal to our backyard.
