

To whom it may concern in regards to Eagle Seal Coating:

Eagle Seal Coating has been working for QFC, Inc. since 2009.

One of the largest jobs Eagle has performed for us was at our Northshore location. The projects was a 161,595 s/f petro mat overlay and re-stripe that exceeded expectations. There have been several other large projects that have netted the same result.

Gary and team have always been professional and stand by their work.

We have found them to be dependable and reliable team players that have partnered well with us to ensure quality results for our stores.

Regards,

Dave Greer

Maintenance Manager

QFC Facilities Engineering
