RE: Eagle Asphalt Sealcoating

To Whom It May Concern,

Lakeridge Paving Co. LLC has been in business since 1968 performing asphalt paving for the Greater Puget Sound Region. We use sub-contractors to perform the work that we do not specialize in such as extruded curbing, sealcoating, and striping. We have worked with a lot of sub-contractors over the years and we require our sub-contractors to have the same high standards as we do.

I would like recommend to you our sealcoating/stripping contractor: Eagle Asphalt Sealcoating. Eagle has been our specialty sub-contractor for sealcoating since 2001. They are a family owned business with family members as owners, managers, and workers. They are professional both in the field and in the office. They stand by their work, they are on time, and we never have any issues with their paperwork, performance, or quality of work. Eagle is dependable, always shows up on time when scheduled, completed their work timely, safely, and with the highest quality. They have great communication between our project managers and our field superintendents. Eagle has always had competitive pricing and warranties their work.

Eagle has been able to perform both small and large jobs for Lakeridge Paving. The smallest job done for us was 14,000 SF and the largest job was 653,000 SF. In 2012 Eagle Asphalt Sealcoating sealed a total of 2,055,000 SF for us.

I would highly recommend using Eagle Asphalt Sealcoating for your future sealcoating/stripping needs. If you have any questions, feel free to contact me at (206) 919-5400.

Sincerely,

Greg O'Farrell
Owner/Member
