Dear Mr. DiPompeo,

I don't usually take the time to thank people for exceptional performance, but in this case, I feel compelled.

As you are aware, your company responded to a sensitive, to say the least, request to expand our existing Public Safety Building, including our new state of the art Communications Center. This work was physically located above our old Communications Center and adjacent to daily used police business offices.

You not only completed all work weeks ahead of schedule, but also with minimal interruption to daily functions.

Thank you for providing an extremely high quality level of construction in a short period of time.

Sincerely,

Frederick J. Ferrara
Commander, Special Operations
