

Testimonials

This company was previously Sky top Roofing. They installed my foam roof in 2003 on a spec house I purchased. After 3 or 4 years they returned at my request for an inspection and said it was still in very good condition. This year I knew it was time for some repairs and coating. I could not find their card or phone number so I called 2 other roofers for repairs and coating. One company did the repairs for 1200.00. They both had given me estimates for coating that I thought were a bit too much. Finally I called Sunvek and discovered it was a name change from Sky top. The estimator came out and sent me a quote within 6 hours. They were also the most reasonable and \$1000.00 less than the other 2. They came the following Monday and did all the repairs the other company had done wrong. They refoamed the bad spots, sanded them off and power washed the roof. The following Wednesday they sprayed on the bright white coating and back rolled the roof. There was no mess whatsoever, and everything was cleaned up and hauled away. I have been a contractor all of my life (electrical) and do not recommend a contractor unless I have a very good experience with them. This company is that good. 100% satisfied and highly recommend.

Sincerely,
Richard M.

The company did a fantastic job. They showed up on time and the adjuster felt the bid was in reason. I would refer them to my best friends and neighbors.

Sincerely,
Harriet S.

Great experience! I had been looking to re-roof after hail damage. Being out of state, had a hard time finding a contractor let alone one who was fully licensed and had workman's comp. The entire project from start to finish was handled with promptness and thoroughness. Their communication was excellent, and the work was above average. Highly recommend!

Sincerely,
Karina

I had SUNVEK fix and recoat roofs of three of my rental properties. The roof consultant was great - very thorough and took the time to explain the scope of the work to be done. A production manager walked the roof, and talked with me about the roofing process, answering the questions I had. The work crew cleaned the flat roofs, removed blisters in the foam and filled them in, then ground down the high areas in the roofs. After the preparation and repair work, the crews coated the roofs with two layers of elastomeric coating, and now the roofs look like new again.

Great job, SUNVEK!

Phoenix, AZ

My favorite CopperPlus project was provided by Skytop, Inc. in Phoenix, AZ. The home is in Desert Mountain, AZ. One photo doesn't do justice to this installation. You have to see this home from all sides to fully appreciate it.

National Account Manager for Heyco Metals, Inc./CopperPlusT

The sky lights look great and, best of all, they don't leak!
I'm in the residential real estate business. I will refer you and your company whenever possible.

Thanks again,
Troy Gillenwater

The tile roof and fascia looks so nice, it makes the rest of the house look old and tired.

Diann

Thank you very much. I am very impressed with your operations and with the many individuals who comprise your company.

Lyn

It was a pleasure dealing with everyone at your company.

Bill

Dear Risto;

I just wanted to compliment your organization; specifically Dan. He is one of the most conscientious contractors I have had the pleasure of working with lately. He has gone above and beyond to repair the inferior previous work on the walk-deck, and obviously takes great pride in what he does. His workmanship is top quality and I really appreciate it.

You and the rest of your team were communicative and did a great job. Ben showed as scheduled and he and his helper made every effort to complete the roof coating efficiently and aesthetically.

Because of the workmanship of Dan and your team, I intend to use your company again on a home I am breaking ground on next month

Thanks for your efforts,
Stu P.
Carefree, AZ

Marilyn;
Thank you for workmanship and courtesy.

Sincerely,
Biel P.

To Whom It May Concern:

I am completely satisfied with every aspect of this roof repair process. First, I want to commend Mike Townsend for his ability to communicate clearly, to act professional in every aspect, and to follow up on promises made. This is the second roof repair in the last year and each time he has been a joy to work with.

Thank you for taking care of all the problems – so far, so good!
The gentleman that took care of repairs and painting in the laundry area did a great job – we're pleased. It's nice doing business with people that stand behind their work.

Thank you,
Susan S.
