CARE Testimonial:

“The EATON Corporation historically used an open top container that required ongoing (two to three times per week) hauler activity. With Compaction And Recycling Equipment’s (CARE/Deep Green’s) full-service rental program we now have a surprisingly low monthly rental payment (\$500.00/month) and have reduced our number of required hauls to once every three-four weeks, EATON’s estimated savings with CARES Rental Program is conservatively \$1,600.00 per month which equates to nearly \$20,000 annually. The Kicker is that CARE is also taking care of ALL of the required maintenance on this equipment. Another significant benefit is that we do not have garbage haulers/trucks coming and going every other day right next to our loading docks. CARE’s equipment rental program has provided EATON with an outstanding solution to its overflow and expensive trash problem, moreover it is saving significant \$’s because of the reduced number of required hauls – THANK YOU CARE & Deep Green!”
