MISSION

SECURALL'S mission is to provide quality, safe and code compliant steel cabinets, lockers/buildings, safes and steel doors throughout the world to ensure the safety of people and the environment. SECURALL will continue its commitment to being proactive in environmental, health and safety issues at its facility and throughout communities and facilities that purchase its products.

WHY IS THE CERTIFIED SUSTAINABLE PRODUCT NECESSARY?

Credible information based on third party product certification to an approved, transparent, consensus-based sustainable product standard is the best product information about the environment and social equity. It eliminates unlawful, harmful and widespread greenwash.

WHY IS SMaRT THE CHOSEN STANDARD?

SMaRT is a multi-attribute standard and is very comprehensive incorporating over 42 other world class environmental standards.

SMaRT requires adherence to the FTC Environmental Marketing Guides.

SMaRT requires an ISO compliant LCA for certification. LCA evaluates environmental benefits of a product over its entire life from raw materials extraction to reuse.

[SMaRT - Other Frequently Asked Questions](#)

SECURALL PRODUCT SPECIFICATIONS

- Made of 99% steel, a highly sustainable material being made of high ratio of recycled content, at least 30% pre-consumer and 99% post-consumer.
- Manufactured using cleaner energy sources since 2000.
- Reclamation program in place for 100% of its product line through referrals to the Steel Recycling Institute.
- Products are tested and/or approved by multiple agencies such as Factory Mutual, Intertek Testing Laboratories, and Underwriters Laboratory to ensure safety, durability, and performance.
- Complies with OSHA, NFPA, and EPA Guidelines.
- Products designed to store flammables, corrosives/acids, paint/ink, hazardous waste, liquid propane, medical gases, pesticides/herbicides, office/tooling, fire rated metal doors, fire rated gun safes, and tornado safe rooms.
- Please contact a sales representative for a quotation on any of your needs listed above.

Questions & Answers

Q: What Does SMaRT Stand For?

A: Sustainable Materials Rating Technology

Q: What are SMaRT Sustainable Products?

A: They are independently certified products deemed to be the best option for the overall sustainability of the environment.

Q: How are SMaRT Sustainable Products Identified?

A: In order to achieve SMaRT Certification a company must score a minimum of 28 out of 157 possible points in the following areas covering all product stages across their supply chain:

1. Safe for Public Health
2. Safe for the Environment
3. Energy Reduction and Renewable Energy Materials
4. Overall Company/Facility Sustainability Requirements including Social Equity
5. Reduce, Reuse, and Reclamation Programs in Place

Q: How are SMaRT Sustainable Products Certified?

A: Manufacturers must:

1. Complete the application process
2. Pass an audit
3. Execute a legally binding contract certifying that the data submitted is accurate, not misleading, and qualified professionals were used
4. Publish a summary of the certification
5. Pass a third party audit
6. Renew and verify certification every three years in order to stay current with environmental trends

Q: What are the Certification Levels that can be Achieved?

A: Silver-41 to 60 points
Gold-61 to 89 points
Platinum-90 to 157 points

Q: What are Benefits of Specifying SMaRT Certified Products?

A: SMaRT Products:

1. Reduce overall pollutants including climate pollution, toxic pollutants, acid rain, ozone depletors, water/air pollutants, and solid/hazardous waste
2. Reduce conventional energy
3. Reuse and recycle products in order to lessen the waste in landfills and incinerators
4. Improve manufacturer/distributor profitability, brand, and competitive advantage
5. According to consumer surveys done by the Federal Trade Commission and environmental research firms, SMaRT Certified products are overwhelmingly preferred

Q: Why Choose a SMaRT Certified Manufacture?

A: SMaRT is:

1. The brand with the most adoptions including AIA, USGBC / LEED Credit, Fire Man's Fund, Sustainable Furniture Council, and City of Santa Monica
2. Transparent, quantified, global and prevents green wash which is unlawful.
3. Incorporates over 20 leading sustainable product standards
4. Developed a consensus standard, the result of 15 years of approvals including Life Cycle Assessment (LCA)
5. Favored for adoption by governments and capital markets, because it is a leadership consensus standard greatly advancing global sustainability and consensus standards substantially reduce risk and uncertainty

Q: What is LCA and why does SMaRT mandate it?

A: LCA evaluates multiple environmental impacts over all product stages as required by law for sustainable products
