

CUSTOMER TESTIMONIAL:

We LOVE our new pendant system! Thank you for creating a system which perfectly complimented our community set up.

The installation and setup process was very simple and we were up and running in a few hours. Also, the remote support is very helpful if we have any questions moving forward.

Two days after installation we had a resident in distress in our courtyard. She was experiencing chest pains and used her new pendant to notify staff.

Staff responded to her call immediately and assessed her condition. Later to find out, this resident was experiencing significant heart problems and we may have saved her life....

This investment has already paid off!!

Thank you for spending time with our staff and showing us how simple yet effective this great system is....
