To Whom It May Concern;

Re: Tapani A. Talo

We have known and worked with Tapani Talo since 1986, during two projects performed with John Burgee Architects.

The latest project was the Port America at the Potomac River next to Washington, D.C. This was a 500,000 sq. ft. twenty-two story tower with a 2,000 car underground parking garage on several levels.

Mr. Talo was one of the production architects and was the best one on the team. He is extremely talented and has a great working personality.

We strongly recommend him for any project or position of responsibility.

Sincerely,

Luis Fernandez  
President
