RE: Professional Reference – Bowlin Construction, LLC

To Whom it May Concern:

This letter of recommendation is being written for Bowlin Construction, LLC in reference to their work as a site contractor in the Metro Atlanta area. Over the course of the last three years Atwell has worked with Larry's team on several projects and more recently in 2022, when they performed and completed the site work at Chamblee Plaza for a complete stormwater management overhaul, and new Publix building and parking lot. This project is located at 5446 Peachtree Industrial Blvd, Chamblee, GA 30341.

The stormwater project consisted of installing +/-220,000 CF of underground storage within the existing parking fields (in three separate areas of the existing shopping center) and providing the site work for a 50,000 SF redevelopment for a new Publix (Store #1777). Extreme caution, and a proactive mindset was extremely important with a project of this magnitude.

As the Civil Engineer of Record for this project and due to the complexity of the site work in an existing and operational shopping center, I and my staff were extremely impressed with Bowlin Construction's professionalism, coordination of details, communication, and overall teamwork. Bowlin Construction has demonstrated through the construction of this difficult project that they have the experience and the know-how to do good site work. I highly recommend them for site work construction on future projects.

Respectfully,
ATWELL, LLC

Brian E. Kay, PE
