

March 28, 2013

I have been contracting with Structural Technologies Inc. for over seventeen years. Their services have ranged from small \$5,000.00 roof replacement to a 5 million dollar window replacement project. Due to STI exceptional attention to detail when providing specifications, bid documents and project management.

I have completed upward of 95% of all major projects within budget with no change orders or unforeseen cost.

I have managed our exterior building envelope since 2009 based on a facilities study and conditions report conducted by STI. They were able to provide me with a comprehensive report that allowed me to present my plan with the necessary documentations for funding.

I have recommend Structural Technologies to my eleven sister hospitals and would recommend them to any facility seeking high quality evaluations or restoration consulting.
