

## Testimonials

“Service with a smile may sound like a cliché; however, that is the appropriate description of Patty May and JPM Enterprises, Inc. Dependable, excellent quality, customer service oriented and clean carpet too.”

— Linda Harper, Tramell Crow

“We have used JPM Enterprises for over ten years. Their dedication is evident in their quality of service. Their dedication to excellence is evident throughout their service we have come to rely on JPM for not only carpet cleaning, but also in the cleaning tasks of chairs and panels. Their teams are top notch professionals and besides their monthly services, they provide emergency service that made me look like a hero. In today’s world where customer service, at times, is nothing but lip service, its a pleasure to do business with a company that goes the extra mile and takes pride in their work.”

— Sharon Henson, National Instruments

“Just wanted to drop you a note and let you know that the floors look phenomenal. Thanks for the great job you always do for us.”

— Rachel Mouser, RGM Advisors

“Thanks for the extra effort on the carpets last night. As always, your team does a great job! ”

— Mike Negro | National Cancer Information Center | American Cancer Society, Inc.

“We looked to janitorial vendors for carpet cleaning. Due to poor results we’ve experienced over the years, I turned to a professional carpet cleaning and found that a company that has an understanding of floor surfaces is well worth the investment. JPM came to my rescue and I began using them throughout Texas with great results. I currently use them as a Tier 1 contractor. Through their efforts, JPM brought the carpet back from the dead..!! They also go the extra mile to assure that their work is done to our satisfaction. JPM’s floor cleaning capabilities are professional, reliable, and affordable resource, for floor maintenance. I highly recommend them and would be happy to offer up them as an example of what can be done if you have the right resource.”

— Bob Shrode, Workplace Solutions
