To Whom it may concern,

I would like to take a minute and tell you that Colleen and her team at Harris Works Systems have done a fabulous job not only on the initial design and install of our office building here in Salem, Oregon but also in the amazing customer support they have provided us over the past 7 years. We have a 15,000 sq ft professional office build and Collen has been there from construction to equip us with the best design, material and price for our complex. All the way from lobby couches, conference room setups, office desk and chairs they have been great to work with. As our company has grown over the last 7 years they have helped expand our office space with the addition of wrap around desk systems and modular setups to accommodate additional work spaces. I have also used Harris Works Systems for a couple of warranty issues and have always had quick response time and good customer service on all items needing warranty work.

I would highly recommend them for any office interior needs a prospective client might have.
