

The Blue Book has proven extremely valuable in identifying local vendors and contractors in the Washington DC area, especially those “niche” providers offering a specialized expertise that may not be readily known in the local market place. I use the Blue Book frequently in my role as a commercial property manager.

Thomas Nastasi has been extremely helpful in bidding out a major contract service as well as bidding out a major project to a vendor on behalf of my properties. Tommy has always exceeded my expectations with every request for assistance that I have made to him and the Blue Book and I appreciate his follow through, attention to detail, professionalism, and customer service. My lead engineer for the property has also worked with Tommy and the Blue Book and shares my view on the value of the service as well as Tommy’s diligence.
