

I have been working closely over the past couple of years messaging Projects through the Bluebook BB BID system. It is a simple process that I just send the information to my Local Account Manager and it is up with an active plan room within 24 hours.

When an Addendum or any type of change is needed to any particular project messaged, that too is messaged out within an appropriate time. The Bluebook team has assisted with Cobalt Construction in finding new Vendors and Subcontractors to add to our Vendor list and qualified for projects in the future.

It has saved so much time in my everyday work to have a service so available at my fingertips.

The Bluebook team is a valuable asset in our construction bidding process.

Thank you,

Harry Jenks
