Re: Angelo Salamanca and Fundisa Restoration Company

To whom it may concern,

Angelo Salamanca was contracted to renovate and supervisor my home in 2009.

His professionalism in providing suggestions and expertise was essential. Explaining the various building materials available, designs and color schemes was extremely helpful. The additional living /activity space improved the appearance and value to our home.

Angelo is cost conscious and strives for perfection. He is dedicated and hard working which is very encouraging in today's economy.

I rely on his good judgment and will recommend him for future projects.
