"We never sleep!"

Over the last year, I have had my doubts to renew my program with the Blue Book. Since the economy has changed it is harder than ever to justify a program if you don't know it is working.

Recently, however, things have changed. Because of the Blue Book and my Business Builder Program I have been awarded two really great projects here in Michigan from a General Contracting firm out of state.

The relationships will grow as the "new connection" I made with the General Contractor through the Blue Book has many more projects to come.

It made sense after all, to be active and follow up on these projects . I can say that the Blue Book has more than paid for the program costs!

Sincerely,

Ben Tarockoff, President
National Building Service
