Tara Orrick
Blue Book Construction Network

Tara,

I am writing you a note to tell you how much I love using the Blue Book Bid system! I am so glad you stopped by a few weeks back and showed me how easy it is to message out projects and post plans in your Syncware plan room. We decided to switch to your system because it allows us to post projects in a very short amount of time and we were able to invite many subs from your database that were not currently included in our own. This enables us to get more bids on a project. We can then meet these subs and suppliers and decide whether we want to add them onto our private vendor list.

I can't believe how easy it is to use and how quickly I picked up how to post the projects. Your BB Bid support people are great in helping me when I get stuck with any questions. This has been a great time saving tool for me.

Respectfully,

Kelly Rhodes
