Tara Orrick

The Blue Book

Dear Tara,

I can't tell you how important your Blue Book bid system has been to us! I have used the system for most of my projects that we bid on this year and we have had great results!

We really believe in trying to find new contractors all the time to work on our projects. We love that we can select all the trades for a specific project and your system finds qualified companies and emails them the details of our project for us! We also love that we can just drop our plans and specs onto your site and you will organize them for us and allow subs to view them. This saves us a lot of time in answering questions from the subs about the job.

We are sorry that we couldn't make it to your networking event this past year. Please let us know about the next one and we will try and be there.

Thanks!
