February 2, 2016

To whom it may concern.

Rochon Corporation is a commercial construction company focusing on General Contracting and Design Build construction in the Office, Educational, Industrial, Multi-family, Religious and Retail building markets.

We have been using the free Blue Book Network services in Minnesota for several years now.

The directory is very helpful and everyone in the office has used it to find subcontractors and suppliers. On-line, it's the ultimate 'Google for subcontractors' reference tool. The invitation to bid service has helped us on bid coverage as well.

The Showcase Networking event is the best construction event in Minnesota and we can easily make business connections with construction professions that attend when they stop at our booth and talk with us.

We now are looking forward to learning more about the BuildingBlok construction management software product and have scheduled a BuildingBlok demo for next week.

The Blue Book Network services help us save time doing our general contracting related tasks.

Sincerely,

**Nick Reynolds**
