Subject: Letter of Recommendation

To Whom It May Concern:

Recently, our firm was introduced to The Blue Book Building and Construction Network by Mark Mayer. This has been a great find for us. As a general contractor with projects throughout California, we are always in need of good local subcontractors who are interested in bidding our work. The Blue Book fills that void perfectly.

Many capabilities are at your fingertips. Where it is not intuitive, customer support is excellent. When setting up projects to bid, it has many supporting features. Very easy to classify, when, how, where and who can bid projects, almost like pre-qualifying the job to the higher quality subs, if so desired. They even have a reporting capability for during and post bid evaluation. I would recommend Blue Book to anyone.

Mike Bogna
VP Construction Services
