October 20, 2010

To whom it may concern,

Today we have been given a presentation of the "Bluebook Network" by Judy Drake. We were very impressed with the opportunities and flexibilities that such a system offers architects, consultants and their clients. The system allows the architect to communicate with everyone involved in a project and still maintain control of all aspects of a project's progression.

Yours truly,

Robert Donabedian, architect
