To Whom it May Concern:

Amp Electric was a sub-contractor for Evans Farms and The Frozen Farmer as we built our new produce market and creamery shop in Bridgeville, Del in 2016. The work included all electrical aspects of this project. Amp Electric not only performed the work in a timely and professional manner, but also went above and beyond the job making electrical recommendations I had not previously thought of. After moving in, I was very glad I had taken their advice in areas they recommended.

Amp Electric is a very capable and professional electrical contractor that we have used on countless occasions since the completion of this project last year. Their workmanship, quality and knowledge is among the best.

The work Amp Electric performs is always adequately staffed and supervised. They take the highest measures of safety and service on their projects, making sure no detail is overlooked. We will continue to use Amp Electric as our go-to electrical sub-contractor for all projects—big and small.

If you'd like to discuss my experience with Amp Electric in more detail, please don't hesitate to contact me.

Sincerely,

A handwritten signature in black ink that reads "Katey J. Evans". The signature is written in a cursive, flowing style.

Katey Evans
Owner, Evans Farms
