To Whom It May Concern:

It is my pleasure to recommend FORM studios, inc. & ABP Development for their dedicated performance at the Demilec USA Blending Facility located at 3315 E Division Street in Arlington, Texas. For the past three years, I as CEO of Demilec USA contracted with FORM/ABP as design professionals overseeing the construction of the state of the art blending facility. During this time, FORM/ABP managed architecture and construction while coordinating with the City of Arlington's Building, Planning and Fire Departments. FORM/ABP is a professional team always maintains a very high quality standard of work. During the design and construction of the facility FORM/ABP was responsible for:

1. Architectural Design Services via the "Design & Build" method of delivery
2. Engineering, Procurement and Construction
3. Construction Management including budget, scheduling and jobsite supervision.
4. Building Maintenance Services
5. Tooling - Tool room layout & organization
6. Automation - Systems and services for automation
7. Security - Design & installation services
8. Surveillance - Real-time observation via smart device
9. ADA Compliance services
10. Access Control design and services
11. Egress analysis & reporting

Based on the opening performance of the factory and experience with FORM/ABP, I have no hesitations in recommending FORM/ABP at the highest level. Do feel free to contact me with questions or inquiries.

Sincerely,
