

09/08/2014

In reference to our experience with Absolute Contracting during a recent renovation for our 5 floor, residential building, Absolute supervisors and personnel were respectful and professional. Safety control, coordination of material deliveries, cleanness, and a safe work environment, resulted in a positive process not only for the building owner and building management but also for our disabled residents. Absolute Contracting's priorities were worker's safety and residents safety. Property Management was constantly updated before and during the ongoing process of the renovation.

We are currently in preparation for additional upcoming work in our common hallways, and Absolute Contracting has been keeping us informed of all processes involved. They have contacted a local architectural firm, and the Fire Department, among others, to assure the approval of suitable materials and address life safety concerns with licensed professionals, to assure a smooth timeline process.

Thanks,

*Milka Martínez
